Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by UK 615'. On page 8 of UK 615', the sixth embodiment is described which sets forth which teaches coating of the pipe on the inside, as instantly claimed. Note that the ratio of the gases supplied can be varied, thus varying the flow rate of the gases as claimed. The size of the plasma flame would then be varied, as claimed, as a result of the variation of the flow rate. AS per claims 2 and 3 the choice of gases used is considered a matter of design and is dependent on the materials being deposited and the temperatures required.

Allowable Subject Matter

Claims 4 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 4 and 14 set forth temperature

sensing as a control parameter of adjusting the flow rate of the gases used, this feature not taught in the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uhm and Neuberger are cited for disclosing pertinent plasma heating systems.
